

Outer Reef Yachts presents
ARGO

Outer Reef's 88-foot, long-range motoryacht *ARGO* is unmatched in quality and sea handling through her design and build. She offers comfort and safety to her owners, guests and crew. *ARGO* was built with sophisticated mechanical systems and has had substantial upgrades to her electronics and information systems. Incredibly fuel efficient at lower cruise speeds, she is capable of providing a 3,000-mile range with her 1,000-hp Caterpillar C-18 engines, and her semi-displacement design allows much higher speeds when required compared to similar length, full displacement yachts. Her hull design, in combination with the Zero speed stabilizer upgrade, provides excellent stability at all speeds.

An expansive cockpit allows easy access for water activities, boarding and fishing, and the Brownies compressor and tank storage benefits divers. Steps lead up to the very spacious aft main deck that offers alfresco dining for eight. The full-beam salon boasts an oversized, L-shaped sofa, bar with wine storage and a flat-screen TV hidden in the entertainment center. The open floor plan steps

up to the spacious and functional galley to port with substantial pantry storage and a dayhead to starboard. The centerline, full-beam bridge can be

completely separated from the galley and salon by a pocket wall and door for night travel or privacy.

Three ensuite cabins are on the lower accommodations deck: a double, walk-around berth in the bow, twin beds to port and a midship, full-beam master that provides a second access through the walk-in hanging locker to the well laid-out engine room. Crew quarters aft of the engine room include a queen berth, full galley and dinette, large stainless work bench, and an oversized freezer.

The flybridge helm area has access from the aft deck or interior staircase and offers protected dual L-seating under the hardtop and a large boat deck with crane.

No expense has been spared on yacht maintainance, and *ARGO* is priced for immediate sale as her owners, after extensive long-range travel, plan to downsize to a new Outer Reef 72-foot yacht as owner/operators. *ARGO* will provide her new owner long-range journeys without limitations and fun-filled, watersports adventures with family and friends. 🐟

SPECIFICATIONS

LOA: 88'
Beam: 21'
Max Draft: 5'6"
Weight: 192,000 lbs.
Fuel/Water: 3,500/500 gals.

Power: Twin 1,000-hp Caterpillar C18s
Cruise/Max Speed: 10/15.5 knots
Year: 2015
Price: \$3,895,000
Location: Fort Lauderdale, FL
